

Echo Features in Patients with Hypertrophic Cardiomyopathy

A Journey Through the Echo Lab - Volume I & II

How to use

Please choose which **VOLUME** you would like to present

VOLUME I: Pick any 2 Modules and 1-2 Cases from case library

- A – Assessing hypertrophy, obstruction, MR (SAM)
- B – Beyond the Basics: Advanced Echo Features (Diastology)
- C – Context of Novel Therapy and Echo Monitoring

VOLUME II: Pick any 2 modules and 1-2 Cases from case library

- D – Discerning Disease (Thick Heart, Genetics, MRI)
- E – Excellence of Sonography (Valsalva and Stress Echo)
- F – Frequency and Flow (Referral Programs Ontario)

CASE LIBRARY

- 1 - Hypertrophy and Obstruction
- 2 - Differentiating LVOTO from MR
- 3 - Complex MR with MAC in oHCM
- 4 - Suspected obstructive HCM
- 5 - Persistent symptomatic obstruction
- 6 - Risk factors for SCD
- 7 - Severe hypertrophy, monitoring, dosing
- 8 - Initiating cardiac myosin inhibitor & echo monitoring
- 9 - Implantable cardioverter defibrillator
- 10 - Apical HCM & apical aneurysm
